PROFESSIONAL SKILLS SUMMARY

Backend Development: C#, .NET, ASP.NET Core, Node.js, NestJS, Express.js, REST APIs, RabbitMQ

Architecture & Software Engineering: Clean Architecture, CQRS, Microservices, System Design, Code Review, Refactoring, Technical Debt, SDLC, Agile, Scrum

Data & Infrastructure: SQL Server, MongoDB, Elasticsearch, LINQ, TypeORM, Data Modeling, Data Processing, Docker, CI/CD, Azure DevOps

GIS & Web: GIS, OGC, WFS, WMS, TMS, OpenLayers, GeoServer, Angular, TypeScript

WORK EXPERIENCE

2021-11 TO PRESENT

Senior Software Engineer at [Intelligent Petro Processors \(INPROC\)](#)

Engineering software company developing web-based systems for gas network simulation, forecasting, monitoring, and analysis.

- Developed backend systems for gas network simulation, gas consumption forecasting, and transmission-network monitoring for the National Iranian Gas Company.
- Designed and evolved backend services using C#/.NET, applying Clean Architecture, CQRS, microservices, and asynchronous messaging with RabbitMQ.
- Improved long-term maintainability through code reviews, Clean Code practices, technical-debt management, and continuous refactoring, including architectural redesign of core packages.
- Built GIS and data-processing solutions using OGC standards, WFS/WMS/TMS, OpenLayers, GeoServer, web scraping, dynamic QueryBuilder-based reporting, and Excel automation.
- Contributed across the SDLC in Agile/Scrum teams, including requirements analysis, technical design, frontend collaboration, DevOps support, knowledge sharing, and mentoring.
- Techs: C# | .NET Core | SQL Server | Microservices | NestJS | Angular | GIS

2018-06 TO 2021-11

Software Developer | Backend Engineer at [Future Technology \(FuTech\) Group](#)

Web and software solutions company.

- Designed and developed ParadiseHub, a multi-branch CRM and workspace management platform supporting 11 user roles, rental plans, reservations, online payments, wallet transactions, financial reporting, and multi-stage application workflows.
- Built advanced query-building and search capabilities over Elasticsearch for large volumes of unstructured and filtered data.
- Contributed as a Backend Developer to HR and recruitment platforms, including IranHR and a job-search engine, as well as mobile application projects.
- Techs: JavaScript | Node.js | Express.js | MongoDB | Elasticsearch

2018-01 TO 2018-06

Full Stack Web Development Trainee at [Maktab Sharif](#)

Web development coding bootcamp.

- Built a web-scraping pipeline to collect job postings from three major Iranian job websites and developed a searchable job-search application.
- Ranked first in the bootcamp and was invited to join FuTech Group as a software developer.
- Techs: HTML | CSS | JavaScript | Node.js | Express.js | MySQL | Git

2017-01 TO 2018-01

Embedded Systems & Software Developer at [Freelance](#)

Embedded systems and software-hardware integration projects.

- Developed control and monitoring software for interactive installations, radiation-monitoring systems, access-control prototypes, and automated parking-gate systems.
- Worked across embedded programming, hardware communication, sensor integration, real-time monitoring, and software UI development using C, C#, AVR, Arduino, Windows Forms, and RS-232.

EDUCATION

2013-09 TO 2018-01

Shahrood University of Technology

- Bachelor of Science (B.Sc.): *Mechatronics and Robotics Engineering*

2009-09 TO 2013-06

Allameh Helli 4 High School (NODET)

- Diploma: *Mathematics and Physics*

LANGUAGES

Persian (Farsi)

Native Speaker

English

Upper-intermediate
